# TANG LYMENG

## DEVELOPER

## ABOUT ME

My name is Tang Lymeng, and I am a fresh graduate in Information Technology Engineering from the Faculty of Engineering, Royal University of Phnom Penh. I am passionate about staying updated with the latest technology trends and am eager to apply my skills and knowledge to contribute effectively to my future team and organization.

## EXPERIENCE

2022 - 2023

### Cambo News | Web application

During my third year in a backend development course, I developed a comprehensive and dynamic news portal using the Laravel Framework. This portal was designed to keep users updated with the latest news across various categories. Key features include multi-language support for non-English readers, user authentication, news categorization, and search functionality.

2023 - 2024

### Insight Post | Web application

- Developed a dynamic blog platform using the MERN stack, enabling users to share their knowledge and expertise. Implemented a robust text editor with multi-image embedding to provide bloggers with the flexibility needed to create engaging content.

## SKILL

NodeJs

ReactJs

MySQL

Laravel

Java
